TULSA FREELANCE REPORTERS 918-587-2878

```
company, the contract growers have a sign indicating
1
 2
      the integrator they happen to contract with that may
      say Tyson or Simmons or George's or Petersons;
 3
      right?
 4
 5
                MR. GARREN: Object to form.
                                                                      01:31PM
 6
             Then they have the farm name on it?
 7
                MR. GARREN: Same objection.
             I'm just reporting what's on the sign.
8
             All right. Well, let's be clear. Are you
9
10
      representing in your report or do you intend to
                                                                      01:31PM
11
      represent that this farm is owned or managed by
      Peterson Farms, Inc.?
12
13
             No.
14
             Is it your intention to represent or suggest
      to the jury that what is depicted in this photograph
                                                                      01:31PM
15
      is a land application being conducted by Peterson
16
17
      Farms, Inc.?
18
             No.
19
             Okay, and I think this photograph came up
                                                                      01:32PM
      yesterday when you were talking to Mr. George about
20
      whether any specific land application had been
21
22
      directly linked to any particular location where
      water pollution had been identified. This land
23
24
      application that's depicted in Figure 3 of your
      report, were there edge of field samples taken from
                                                                      01:32PM
25
```

TULSA FREELANCE REPORTERS 918-587-2878

1	that field?	
2	A I can't recall as we sit here at this moment.	
3	Q All right. Can you tell me whether you or	
4	anyone else on the plaintiff's expert team to your	
5	knowledge has drawn a direct correlation between 01:32PM	
6	this land application depicted in Figure 3 and any	
7	specific water contamination in the Illinois River	
8	watershed?	
9	MR. GARREN: Object as to form.	
10	A I don't know at this time. 01:32PM	
11	Q Is there anything strike that. Okay. Sir,	
12	would you turn to Page 46 of your report, please.	
13	The top of the page, do you see the sentence that	
14	begins as shown in Figure 14?	
15	A Yes. 01:33PM	
16	Q All right. Just so we're clear, this is part	
17	of your statement of your Opinion No. 19, and you	
18	say, as shown in Figure 14, soils more susceptible	
19	to runoff dominate in the eastern and western	
20	portions of the Illinois River watershed, while 01:33PM	
21	soils that are more susceptible to infiltration	
22	dominate in the central portion of the Illinois	
23	River watershed; correct?	
24	A That's correct.	
25	Q All right. Let's look at Figure 14. All 01:34PM	

TULSA FREELANCE REPORTERS 918-587-2878

1	Q All right. How many edge of field samples
2	were collected from fields you actually had sampled
3	the soil in the pasture?
4	A Very few. I can't give an accurate number on
5	that. 03:15PM
6	Q All right. So when you overlay litter samples
7	with soil samples with edge of field samples, the
8	fact of the matter is you don't have any of those
9	samples at the same place where you tracked the
10	litter to the soil to the edge of field and then 03:16PM
11	you're looking at the plots of that; you haven't
12	done that, have you?
13	MR. GARREN: Object to form.
14	A No, and you wouldn't need to in looking at
15	this as a population. 03:16PM
16	Q Because on a field-by-field basis, that's not
17	relevant to your evaluation?
18	MR. GARREN: Object to form.
19	A It is not.
20	Q When you look at Figure 19, you'd agree that 03:16PM
21	as it relates to phosphorus, zinc, copper and
22	arsenic, that there's no fingerprint involving those
23	constituents that would characterize edge of field
24	runoff in the Illinois River watershed; correct?
25	MR. GARREN: Object to form. 03:17PM
